

### Lab Scenario for EFS

#### EFS Creation steps

1. Create/Existing VPC with 2 Subnets in 2 different Availability Zone.
2. Create an Security Group to allow the source IP's for EFS.
3. Create 2 machines each one in each Subnets.
4. Create an EFS with option to be part of both Subnets.
  - a. Recommended -- Assign a Static IP on the EFS.
5. Login to the both the EC2 instance.
6. Mount the EFS on both the EC2 instance
7. Create and save an File on this mount Folder in 1st EC2 instance.
8. Edit the same file from 2nd EC2 instance.

#### End Result

Both the EC2 instance should be able to READ and Write to the same file. ( NOT WRITE SIMULTANEOUSLY).
