Lab Scenario

1. Create an EC2 instance with "**m5d.large**" **with** windows OS.
2. Login to the windows machine. (RDP in to it)
3. Format the new "Temp" drive.
4. Create a file in that "new drive"
5. Restart the EC2 instance.
6. Check if the file is still available.
7. Now Shutdown the EC2 instance.
8. Check if the file is still available.

Note→ DO NOT ATTACH ANY EBS VOLUME FOR THIS SCENARIO

ALSO, TRY TO FINISH THE LAB WITHIN 1 HR, SO THAT THERE IS NO COST INCURRED.

TRY THE SAME ON LINUX MACHINE AS WELL.
